

Caring for your magnetic signs

Please read these very important magnetic sign installation, maintenance and storage instructions. If you carefully follow the outlined care, your satisfaction and the longevity of your signage will be assured.

INSTALLATION

1. Wash and dry area on vehicle where magnetic sign will be placed.
2. Wax area on vehicle where magnetic sign will be placed.
3. Apply magnetic sign on area making completely sure that entire sign is in contact with vehicle body. Check to make sure no edges are sticking up and that no air pockets are trapped under sign. You may correct any edges that are not in contact with vehicle by carefully bending that part of the sign back slightly. **DO NOT CREASE!** Magnetic signs cannot be placed over repaired areas that use body fill. Since body fill is not metal, magnetic signage will not stick to these areas. Find another suitable area on the vehicle to display your sign.

MAINTENANCE

1. Remove sign from vehicle once a week.
2. Wash, dry and wax area where sign will be placed.
3. Clean and dry front and back of signs, taking care over vinyl lettering or logo areas.
4. Replace sign on vehicle at a slightly different spot. Use a mild nonabrasive detergent and a sponge to wash sign. Rinse thoroughly. Wipe sign dry. Do not immerse in water. Do not use steam or pressure to wash signs. Do not take sign through car wash - remove first.

STORAGE

1. Store sign flat on a metal surface, or...
2. Store sign rolled up in a tube, magnetic side in / printed side out. When storing sign inside mailing tube, use a 4" diameter size, no smaller. Do not roll tightly, roll as large as possible to fit just inside tube. Take care not to leave magnetic sign unprotected and unrolled inside a hot vehicle. Except when 'in use', high temperatures can distort your sign. Do not fold, crease or place heavy objects on top of sign. When the aerodynamic properties of the sign are damaged, your sign may blow off of your vehicle. Try straightening sign by placing it on a flat metal surface: Filing cabinet, metal desk, or refrigerator. Leave in place for one or two days.

We cannot be held responsible for the misuse or misapplication of your signs that may result in damage to your sign or vehicle.
